The **“Report”** button is a safety feature that allows customers to alert the noon team about inappropriate, offensive, or misleading reviews posted under seller profiles. This helps keep our platform safe, transparent, and respectful for all users.

Once submitted, a success message will appear, and a confirmation email will be sent to your registered email address.

What Happens After You Submit a Report

Once a report is submitted, noon’s moderation team reviews it carefully to determine whether the content violates the [Community Guidelines](#) or [Seller Review Guidelines](#).

-

If the review is found to be in violation, it will be removed or edited as appropriate.

-

If the review complies with the guidelines, it will remain visible.

-

Reporting a review does not affect a seller's overall rating unless the review is confirmed to be invalid.
