

Updating Your Delivery Address

You can update the delivery address for an active order as long as the item has not reached a stage where the address can no longer be changed. Address updates may affect delivery timelines depending on the new location.

Steps to update the delivery address

Before updating the address on an existing order, make sure the new address is already saved in your Address tab.

- Log in to your noon account.
- Open the **Orders** tab.
- Select the specific item you want to update.
- Click the item to view its **Tracking Details page**.
- Use the **Update address** button to switch your delivery to another saved address.

Important Information

- Updating the address may cause delivery delays depending on the distance between the original and new delivery locations.
- Address changes may not be available if the item is too far along in the delivery process.
