

How to Know if Your Order Is Accepted

In some cases, noon may need to verify your order details after you place an order.

If verification is required, you will see a message in the Orders tab notifying you that your order is under review.

A noon representative may contact you to confirm your information. Once your order is verified, you will receive an email and app notification confirming acceptance.

You can check the real-time status of your order anytime in the '**Orders**' tab.
