

noon Reviews

noon allows customers to share reviews about products and seller experiences. Reviews help customers make informed decisions and improve trust in online shopping.

Types of Reviews

Product Reviews: Shared publicly and relate only to the product purchased.

Purchase Reviews: Visible only to the seller and relate to the customer's experience with the seller's service.

Review Approval

noon publishes reviews that are genuine, appropriate, and relevant. Both positive and negative reviews are accepted if they follow guidelines.

Reviews Not Approved

- Reviews may be rejected if they include:
- Languages other than Arabic or English
- Personal customer details
- Abusive, offensive, racist, or threatening language
- Comments unrelated to the product
- Fraudulent schemes or advertising
- Employee experience
- External links
- Competitor references
- Service complaints that belong under Purchase Reviews

Additional Rules for Product Reviews

Product reviews must focus only on the product itself. Issues related to service—like wrong or late delivery, missing items, or damaged goods—must be submitted as purchase reviews or customer support requests.

How Reviews Are Used

noon uses reviews to calculate seller and product ratings. Recent reviews have the strongest influence.

If a purchase review violates guidelines but contains relevant information, noon may keep the rating while removing the comment.
