
noon Pickup Points

noon Pickup Points allow you to collect your order from one of noon's partnered stores instead of receiving it at your home or office. This option appears at checkout when eligible for your order and location.

How to Use a Pickup Point

- At checkout, select Add a New Address.
 - Choose Locker or Pickup Point to view all available locations near you.
 - Select the most convenient Pickup Point and save it to your address book.
 - Place your order as usual.
 - You'll receive a confirmation email and SMS once the order is ready for collection.
-

Collecting Your Shipment

To pick up your order:

- Open My Account on the noon app and tap QR Code.
 - Show the dynamic QR code to the store representative.
 - They will scan it and hand over your package.
 - The QR code must be shown through the app as it refreshes dynamically.
-

Pickup Window

- You have 5 days to collect your shipment once it arrives at the Pickup Point.
 - If the package is not collected within this timeframe, it will be returned and you will receive a full refund.
-

Order Limits for Pickup Points

- Maximum order value: EGP 2,000
 - Maximum number of items: 5
 - Cash on Delivery (COD) is not available for Pickup Point orders.
-

Why the Pickup Point May Not Appear

The option may not be available if:

- No Pickup Points exist near your location
- The items are oversized (e.g., appliances, TVs, refrigerators)
- Items are temperature-sensitive or easily damaged (e.g., chocolates, frozen foods)
- Your order contains more than 5 items

Important Notes

- Once you select a Pickup Point as your delivery address, it cannot be changed to a home or office address.
- Pickup Points do not support returns. Submit a return request through the app or website and use a standard delivery address for pickup.
- Active Pickup Points can be viewed when adding a new address. Use the “Show me noon lockers and Pickup Points” toggle to display all available locations on the map.
